

MSDS REPORT

1 Product and enterprise identification

Name of product: Brow Mapping Paste (to cover all colours)

Name: The Brow Geek Ltd

Product Group Name: Mapping Paste

E-mail address: hello@thebrowgeek.co.uk

Issue date: 205th june 2024 Version: 2.1/

File status: distribution Recommended use: Brow Mapping

.....

2. Risk overview

Hazard description - according to the classification of GB12268-2012, this product belongs to non-dangerous goods.

Environmental hazard: None

Explosion hazard: None

Precautions – disposal

The disposal of this product / container should comply with the applicable regulations.

.....

3. Ingredient/composition

Chemical composition	CAS No.	Percentage
Deionized water	7732-18-5	50
Propylene glycol	57-55-6	5-10
Dispersant	25133-97-5	<10
Pigment		4.5
.....		

4 First aid measures

Eye contact: wash eyes with plenty of water and see a doctor. If symptoms persist, seek medical attention.

Skin contact: harmless to skin

Inhalation: Get out of the scene quickly to fresh air, keep the airway open, if breathing is difficult, give oxygen, if breathing has stopped, give artificial respiration immediately and seek medical attention.

Ingestion: rinse mouth, drink plenty of water and seek medical advice.

.....

Fire protection measures

Hazard characteristics: None

Suitable extinguishing agent:

Please use Class B extinguishing agent (e.g. chemical powder, carbon dioxide)

Precautions for firefighting: water polluted by firefighting shall not be discharged into reservoir, ditch or surface water. Adequate measures should be used to collect the contaminated water. Contaminated water and soil should be collected or disposed of in accordance with regulations

.....

5 Leakage Emergency Treatments

Personal precautions:

Unprotected and untrained personnel are evacuated from the hazard site. Spills must be cleaned up by professionals.

Environmental management procedures

If there is a large amount of overflow, the sewer inlet should be covered and a protective dike should be built to prevent the overflow from flowing into the sewer or water environment.

Collect the resulting solution containing the residue.

Place in a closed container approved by the relevant authority for transportation.
Dispose of the collected material as soon as possible.

Cleaning method

See Precautions in other sections. Collect spills in containers. Clean from the edge of the spill inward and cover with bentonite, vermiculite, or inorganic absorbent material. After absorption, mix until dry. Collect as much spillage as possible. Clean up the residue of the product with appropriate adsorption material selected by professionals. Read and follow the safety instructions on the solvent label and safety instructions to use this product.

.....

6 Handling and storage

Storage requirements

Incompatible substances: store away from heat sources.

Store away from direct sunlight.

Ventilation: keep the container in a well ventilated place.

Instruction:

Avoid eye contact.

Do not eat, drink or smoke when using this product. Wash the contact area thoroughly with soap and water.

Keep container closed.

.....

7 Exposure control / personal protection

Eye protection: avoid eye contact.

Wear the following protective clothing alone or in combination to avoid eye contact.

Wear safety glasses with side shield.

Hand protection: None

Skin protection: Observe good industrial hygiene and safety practices

Ingestion: do not eat, drink or smoke when using this product. Wash the contact area thoroughly with soap and water.

Keep out of reach of children.

.....

8 Physical and chemical properties

Physical form, color, smell Low viscosity liquid.

Red, very mild smell.

Ph Value 8-10

.....

9 Stability and reactivity

Situation to avoid: heat

Substances to be avoided: strong oxidants Decomposition reaction of hazard:

Carbon monoxide is produced during combustion

Carbon dioxide is produced during combustion

Stability and reactivity:

There will be no harmful polymerization.

Stable.

.....

10 Toxicological information

Eye contact effects: moderate eye irritation: signs / symptoms include redness, pain, tears and blurred vision

Skin contact effects: no irritation

Toxicity data

No information available

.....

11 Ecological information

Ecotoxicity data:

Undetermined

.....

12 Waste disposal

Waste nature: nonhazardous industrial waste.

Residue disposal: according to the local chemical waste regulations.

Packaging waste: contaminated packaging should be discarded in the same way as the product. Uncontaminated packaging materials can be disposed of or recycled in the same way as household waste.

The disposal of this product / container should comply with the local / superior

regional / national / international applicable regulations.

13 Transportation information

Dangerous Category: non dangerous goods

UN number: not applicable

Mo category: not applicable

ICAO category: not applicable

14 Regulatory information

Regulations on the safety administration of dangerous chemicals (adopted at the 52nd meeting of the State Council on January 9, 2002)

Detailed rules for the implementation of regulations on the safety management of dangerous chemicals (HLF [1992] No. 677)

Regulations on the safe use of chemicals in the workplace ([1996] LBF No. 423)

Classification and marking of common dangerous chemicals (GB 13690-2009)

Law of the People's Republic of China on the Prevention and Control of Solid Waste Pollution

General technical conditions for transport packaging of dangerous goods (GB 12463-2009)

15 Other information

Filling Department: made by (embargoed info)

The information in this safety technical manual is based on the product information we have now. Its validity is limited to the date of being claimed.
